

# Delivering EPR Transformation to Alder Hey

*An outcomes based solution from Evolution Digital Health*

## Background

Alder Hey Children's Hospital NHS FT needed to enhance its Meditech Electronic Patient Record (EPR) programme to improve outcomes for patients and staff.

## Challenges

The hospital required specialised expertise and flexible capacity to deliver a comprehensive EPR programme while staying within budget.

They specifically needed professionals with Meditech platform experience.

## Solutions

Evolution partnered with Alder Hey to provide a bespoke EPR services solution featuring a milestone-based programme delivery model and an elastic workforce of Meditech specialists.

### Key metrics

## £216,500

in quantifiable cost savings through VAT reclaim and flat-rate cost structure

## HIMSS LEVEL 7

Our work enabled the trust to achieve the highest level of digital maturity

**Implementation**  
team of Meditech  
and EPR  
specialists

**Milestone-based**  
programme  
framework with  
clear metrics

**Flexible**  
resourcing model  
for scaling team  
size

**Platform-specific**  
expertise and  
training

**Ongoing**  
technical support  
and maintenance

**Project**  
management and  
oversight services

## Project Team

Evolution supplied a 48-member project team, including the following:

Project Manager

Business Change  
Analyst

Migration  
Specialist

Integration  
Support  
Specialist

Testing Lead

Meditech  
Trainer

Digital  
Transformation  
Programme  
Manager

# Delivering EPR Transformation to Alder Hey

*An outcomes based solution from Evolution Digital Health*

## Outcomes

The hospital successfully enhanced its EPR programme while maintaining focus on core operations, with the elastic workforce model enabling efficient resource allocation throughout the project phases.

## Benefits

1

### Cost Efficiency

Flexible resourcing model eliminated unnecessary overhead and allowed for budget optimisation

2

### Specialised Expertise

Access to experienced Meditech professionals enabled smooth implementation and reduced training needs

3

### Operational Continuity

Hospital staff could maintain focus on patient care while Evolution handled technical implementation and support

Having worked with Evolution for several years they evidenced quite early on that they understand the requirement of building an EPR team. From the Programme Director to the Test Lead, Data Migration expert, PMs, and many more. Not only do they understand the delivery needs they are also aware of how an EPR is built to ensuring patient safety. The team at Evolution have spent time working with me on my needs to establish the right team to work with and a testament to this is the ongoing relationship I have with Evolution and that my team also has. My team and I have been together well over a year now this again speaks for itself when creating a team, that Evolution were able to bring together professionals who can create a unified team to build a substantial EPR.
